

## CURRENT REPORT 9/2025

April 8, 2025

### Decision not to enter into a Grant Agreement with the Medical Research Agency

The Management Board of Ryvu Therapeutics S.A. with its registered office in Krakow, Poland (the “Company” or the “Issuer”), announces that on April 8, 2025, it decided not to enter into a grant agreement with the Medical Research Agency (in Polish: Agencja Badań Medycznych, “MRA”) regarding the project titled: *“Identification of selection markers for patients that can benefit from the treatment with novel PRMT5 developed by Ryvu Therapeutics”* (Ref. No. KPOD.07.07-IW.07-0250/24). This project had previously been recommended for funding under the Call for Proposals for Entrepreneurs to Conduct Research in the Area of Drug Safety, Innovative Therapies, and Medicines of the Future (2024/ABM/05/KPO), as reported by the Issuer in Current Report No. 3/2025 dated February 7, 2025.

The decision to withdraw from signing the agreement results from a strategic shift in the scope of the Company’s translational research, which will now focus on the treatment of tumors that may benefit from the newly identified blood-brain barrier–penetrating properties of RVU305 — such as gliomas and cancers with a high propensity to metastasize to the brain.
